

# IMS Paintable Organic Oil A4 Mold Release

## Heavier lecithin in a low-concentration spray

High-viscosity, vegetable-based release forms a thin, tough layer of mold release that lasts for many cycles. Many jobs respond well to this high-viscosity lecithin. Often used for epoxy resins. Minimizes environmental stress cracking and crazing on polyethylene.

- For molded parts to be painted, plated, printed, or ink stamped
- Approved for food packaging: FDA 21 CFR 184.1400 GRAS
- Rated USDA H-1

# L-6 Paintable Lecithin Mold Release

## Lighter lecithin in a medium-concentration spray

Thinner, oily lecithin spray provides best release for many jobs. Use where FDA specs must be met. Use where painting, plating, stamping or printing are done.

- Use where parts are to be painted, plated, printed or hot-stamped
- Low toxicity
- Approved for food packaging: FDA 21 CFR 184.1400, also GRAS
- Fast evaporating
- Rated USDA H-1
