

# IMS Night Coat™ Rust Preventive and Acid Neutralizer

*Stops corrosion during short- OR long-term shut-downs*

## IMS Night Coat is EXCELLENT...

1) as an overnight or short-term rust preventive  
 Just spray it on at shut-down. Night Coat penetrates and quickly wets out across the mold, displacing moisture and neutralizing acid from fingertip perspiration. Night Coat is easily removed by start-up shots or with standard solvent

ALSO

2) as an acid-neutralizing surface preparation  
 for longer-term rust preventives

*(A must when molding PVC or CPVC, where out-gassed hydrochloric gas combines with moisture to create corrosive hydrochloric acid.)*

Just spray it on and wipe away any puddles. Then apply IMS Step 2, Heavy Coat or any other longer-term protector

Night Coat Rust Preventive and Acid Neutralizer		
142877 (10 oz. fill)	1-71	\$3.65 each
	72-143 (save 5%)	3.47 each
	144 or more (save 10%)	3.29 each

## IMS Step Two Rust Stopper

*Part of a Two-Step Process for Mold Surface protection for PVC and CPVC Molding*

Use our Two-Step System to protect even the most highly polished tooling when you process PVC or CPVC.

- 1) The first step is to clean the mold with IMS Night Coat. Wipe up any puddles.
- 2) Next apply Improved IMS Step Two to chemically prevent rust and provide a tough barrier against future exposure to moisture and acid.

Improved Step Two is also a great, general-purpose rust preventive for indoor or outdoor mold storage.
