

IMS Night Coat™ Rust Preventive and Acid Neutralizer

Stops corrosion during short- OR long-term shut-downs

IMS Night Coat is EXCELLENT...

1) as an overnight or short-term rust preventive
Just spray it on at shut-down. Night Coat penetrates and quickly wets out across the mold, displacing moisture and neutralizing acid from fingertip perspiration. Night Coat is easily removed by start-up shots or with standard solvent

ALSO

2) as an acid-neutralizing surface preparation
for longer-term rust preventives

(A must when molding PVC or CPVC, where out-gassed hydrochloric gas combines with moisture to create corrosive hydrochloric acid.)

Just spray it on and wipe away any puddles. Then apply IMS Step 2, Heavy Coat or any other longer-term protector

Item #	Quantity (packaged 12 cans per case)	Prices per can
Night Coat Rust Preventive and Acid Neutralizer		
142877 (10 oz. fill)	1-71	\$3.2500 each
	72-143 (save 5%)	3.0875 each
	144 or more (save 10%)	2.9250 each

- ★ Helps protect and preserve the value of your molds
- ★ Helps reduce downtime and mold maintenance costs
- ★ Helps decrease your costs and inventory of mold care products

Replaces #100560 Overnight and #100551 Step 1

IMS Step Two Rust Stopper

Part of a Two-Step Process for Mold Surface protection for PVC and CPVC Molding

Use our Two-Step System to protect even the most highly polished tooling when you process PVC or CPVC.

- 1) The first step is to clean the mold with IMS Night Coat. Wipe up any puddles.
- 2) Next apply Improved IMS Step Two to chemically prevent rust and provide a tough barrier against future exposure to moisture and acid.

Improved Step Two is also a great, general-purpose rust preventive for indoor or outdoor mold storage.
