

Perforated DROOL DISC™

Stops drool from damaging heater bands and wiring

Let IMS Drool Disc™ Heater Band Protectors protect your equipment by preventing material drool from oozing back onto your heater bands, wiring and insulation blankets. The disc obstructs the path of the drool and keeps it in front of the nozzle. IMS Drool Discs™ are inexpensive enough to place on every machine.

Perforated Inside diameter to fit most nozzles — just trim to size!

Flexible Composite Material

Designed and engineered expressly for this application

Modified closed-cell copolymer foam, cast directly between a lightweight fiberglass and a slightly heavier fiberglass coated with silicon resin.

SPECIFICATIONS

Max. Temperature: 700° F

Size: 6" dia. by 1/8" thick
